Introduction

Contents **What is AutoPlay?**

What is AutoPlay?

AutoPlay Media Studio is the state of the art in CD-autoplay multimedia tools. With its intuitive workflow and drag-and-drop objects, even absolute beginners can quickly achieve impressive results. But despite its world-renown ease of use, AutoPlay Media Studio is a serious development tool. In fact, it's used by thousands of people to create everything from AutoRun/AutoPlay menus and CD business cards, to fully interactive training applications. With AutoPlay, your imagination is your only limit!

What Can I Create With AutoPlay Media Studio?

Quite simply, AutoPlay Media Studio helps you make professional multimedia software. While the product excels at certain tasks like making front-end browsers for CD-ROMs (i.e. AutoRun/AutoPlay menus), that's just the beginning.

Integrating diverse media types such as images, sounds, videos, text, and flash into a single cohesive
